

any deleterious clinical effects, despite the variety of metabolic changes that have been demonstrated in laboratory experiments. On the basis of the findings in this pilot study, further investigation of clinical effects of pulsed magnetic fields in OA is warranted.

#### ACKNOWLEDGMENT

We acknowledge Dr. Robert Lehman and colleagues (Department of Radiology St. Mary's Hospital), for radiographic interpretation; Thomas Papachristos M.S. SM (AAM) for laboratory assistance; Melissa Gerhardt, Jodi L. Hæusgen and Cheryl L. DeLisle for technical assistance.
